15th September 2011

Dear Mrs Aluskina,

Our exclusive Russian distributor "BPC Engineering" has informed us that Nizny Novgorod State University have selected 2 x Capstone C1000 microturbines as the core generation equipment in a project to renovate the legacy boiler house. This will increase the reliability and efficiency of the power supply to the University facilities and as such your bank is financing this project.

We are very proud to be selected by such a respected customer and we are always honoured when we participate in the modernisation of the energy infrastructure in Russia.

In relation to this project we can confirm that the only company able to deliver, commission and maintain the Capstone range of products in Russia, is BPC Engineering. We do not have direct or indirect agreements or relationships with any other company.

BPC have informed me that "Energonezavisimost" are suggesting they are able to supply Capstone product into Russia. Energonezavisimost are not authorised to purchase or provide warranty for, any Capstone product.

A further critical factor is the delivery date to site before the end of 2011. Please be informed that BPC have secure production slots and ex works credit to meet this deadline.

Yours faithfully

A handwritten signature in black ink, appearing to read "Trevor Rainbow".
